CUMULATIVE INDEX TO NURSING & ALLIED HEALTH LITERATURE
P.O. Box 871, Glendale, California 91209
Phone: 213 240-2819

PREFACE

CINL, the original index for the nursing profession, in its twenty-second volume (1977) expanded its coverage of allied health journals. The addition of selected journals for allied health professionals brings the total number of journals currently indexed in this widely used reference tool to some 250 journals. Today's multidisciplinary team approach to the delivery of health care for the patient as a whole person, makes this continuous expansion imperative.

CINL's new title is the CUMULATIVE INDEX TO NURSING & ALLIED HEALTH LITERATURE--CINAHL for short.

CINAHL offers an easy-to-find and easy-to-read authoritative subject-author reference to a broad selection of subject matter of importance to progressive nurses and related health professionals as found in current periodicals and serials.

CINAHL is the only index to nursing periodical literature for the years 1960-1965.

CINAHL indexes all major nursing periodicals in the English Language as well as selected periodicals for the following allied health professions:

- Cardiopulmonary Technology
- Health Education
- Laboratory Technology
- Medical Assistant
- Medical Records
- Occupational Therapy
- Physical Therapy & Rehabilitation
- Radiologic Technology
- Respiratory Therapy
- Social Service in Health Care

CINAHL indexes selectively for the nurse and related health professionals other ancillary serials including major medical journals. Approximately twenty-five percent of the articles indexed are from non-nursing journals.

CINAHL, since early 1967 and the inception of the National League for Nursing's Standing Publications Service, indexes all serials published by the League.

CINAHL indexed the American Nurses' Association Subscription Service from February 1968 - January 1970 when the Service was discontinued by the Association. CINAHL resumed indexing of ANA publications in 1976.

CINAHL, beginning with the 1970 Cumulation, lists all ancillary journals scanned, giving dates for articles indexed.

CINAHL, beginning with the 1972 Cumulation, includes journals of state nursing organizations.

CINAHL is also a guide to audio-visual materials, book reviews and pamphlets.

NEW TITLES INDEXED IN THE 1977 CUMULATION INCLUDE:

- AMERICAN JOURNAL OF MEDICAL TECHNOLOGY
- THE AMERICAN JOURNAL OF OCCUPATIONAL THERAPY
- AMERICAN JOURNAL OF PHYSICAL MEDICINE

CRITERIA FOR SELECTION OF MATERIALS

- A. Articles from nursing and allied health journals which meet the following criteria:
 - 1. Original, signed, substantive articles and selected unsigned articles pertinent to nurses and allied health professionals.
 - 2. Editorials of national and international scope and editorials.
 - 3. Biographies and obituaries with substantive background materials. Reports about outstanding nurses and allied health professionals of national or international interest, including presidents of state organizations. See Name Section.
 - 4. Reports of national and international organizations and conventions which have comprehensive nursing or allied health professional information or content.
 - 5. Important national legislation regarding basic changes pertinent to nursing or allied health professions or to major health plans.
 - 6. Poetry, if considered pertinent to nursing or allied health.
- B. Articles from medical science journals, as well as certain periodical literature containing articles pertinent to CINAHL users which meet the following criteria:
 - 1. Articles with nursing or allied health content.
 - 2. Articles which, in the judgment of experienced indexers, contain materials pertinent to nurses and allied health professionals.
- C. All serials published by the American Nurses' Association; the National League for Nursing, and the United States Department of Health, Education, and Welfare, Division of Nursing.
- D. Audio-visual materials, book reviews, and pamphlets as listed in the journals indexed. See appendix.
- E. Types of materials not included in the Index:
 - 1. Information of dated or transient nature, e.g. notices of forthcoming meetings, etc.
 - 2. News items, abstracts, briefs, summaries and letters to the editor.
 - 3. Financial reports, election details, committee activities, resolutions and bylaws of national, international and local associations.
 - 4. Reprints of materials, except those in Nursing Digest and foreign journals.
 - 5. Editorials of local interest.
 - 6. Promotional, parochial or secular articles.
 - 7. Question and Answer columns diversified in content. Question and Answer columns of a comprehensive nature may appear as Regular Column entries.

HOW TO USE THE INDEX

The CUMULATIVE INDEX TO NURSING & ALLIED HEALTH LITERATURE is a subject-author (or name) index. Beginning with 1967, Volume 12, subjects and authors (or names) are filed separately. The name section follows the subjects and cross references. This section includes entries for authors, biographees, and the deceased. Entries for biographies and obituaries are enclosed in parentheses.

Frequently subject headings are divided, as:

NURSING EDUCATION--GRADUATE

Ample use of "See" and "See also" references guide the user, as:

Assessment See: DIAGNOSIS, MEDICAL-SOCIAL; DIAGNOSIS, NURSING

To aid the user of the Index, all "See" and "See also" references are included in the cumulated volumes even though the subject referred to may not be used in the particular volume. The searcher is thus directed to other cumulations and/or bimonthly issues.

Entries are not limited to a minimal indication of the general context of the article. Articles are indexed in depth with no limit as to the number of subject headings per article.

In the subject entries the name of the first author appears in parentheses after the title.

Example:

ALLIED HEALTH EDUCATION

Faculty appointments, promotions,
and tenure policies in the allied
health professions (Holcomb JD
et al) (research) J ALLIED HEALTH
6: 24-7, Spring 77

In the author entries the name(s) of the author(s) up to a maximum of three appears first, followed by initials, the title of the article, the abbreviated journal title, the volume, page, month and year. "See" references are included for the second and third authors.

Example:

HYMAN E, ASHENMACHER FE,
WILLIAMS M ET AL: The pouch
ileostomy: new nursing applica-
tions of time-tested techniques
(pictorial) NURS 17 7: 44-7,
Sep 77

To aid those involved in research, all formal research articles, as well as surveys and studies which are tools

of research, are indexed under their clinical subject heading with "research," "research, med" or "research, nurs" in parentheses as a descriptive phrase immediately following the title or author.

Example:

Some structural considerations in
modular education for basic nurs-
ing students (Harrison J et al)
(research, nurs) J ADV NURS 2:
383-91, Jul 77

Care studies and illustrated articles are identified by the use of "care st" and "pictorial" in parentheses in the body of the entry.

Example:

Symposium on diabetes: patient
education and care (Porter AL)
Foreword. NURS CLIN NORTH
AM 12: 361-2, Sep 77

A new diabetic with complications
...Evanston Hospital, Evanston,
Illinois (Bohdan ST et al) (care st)
(pictorial) NURS CLIN NORTH AM
12: 393-406, Sep 77

Geographic subheadings are used only where the content of the article includes significant geographic data or when the historical importance requires geographic identification.

Example:

NURSING EDUCATION--HISTORY--
UNITED STATES

The evolution of nursing education
in the United States: 100 years
of a profession for women (Watson
J) J NURS EDUC 16: 31-8, Sep 77

Full journal titles for the abbreviated titles used in the entries are given in the List of Journals Indexed, in the front of the Index. Following is an added list of ancillary journals from which articles have been selected for inclusion in the supplement or cumulation.

Beginning in January, 1968 under each subject heading the entries are arranged by journal title.

Beginning in January, 1969 "See" references are included for joint authors.

For further helpful suggestions on the use of the INDEX, see the preface to a List of SUBJECT HEADINGS bound with the Annual Cumulation.

REGIONAL MEDICAL LIBRARIES

The Regional Medical Library in your area (see list below) may be able to supply journal articles not available in your own library. If the Regional Medical Library Network cannot meet your need, hopefully, we can locate the article for you in the Glendale Adventist Medical Center Library, where the CUMULATIVE INDEX TO NURSING AND ALLIED HEALTH LITERATURE is published. CINAHL's charge for this service: 10¢ per page, minimum fee of \$2.00.
